

Your Full Name

Your target role or professional headline

Your portfolio URL | Your LinkedIn URL | Your GitHub URL | your.email@example.com

Professional Summary

The skill will fill this section using the information from the provided job posting URL and the relevant facts already present in your CV template.

Example:

Product-focused software engineer with experience building automation tools, integrating APIs, and improving operational workflows for cross-functional teams.

Experience

Add your professional experience in reverse chronological order. Include job title, company, dates, location, responsibilities, and measurable achievements. Keep the facts truthful so the skill can tailor, keep, or remove items based on the job posting.

Example:

Software Engineer | Example Company

January 2022 - Present | Remote

Describe your role in clear, factual language. Mention the products, systems, teams, or business areas you worked with.

Some achievements in the role included:

- Built an internal workflow automation that reduced manual reporting time by 40%.
- Integrated third-party APIs to synchronize customer data across sales and support systems.

Volunteering

List relevant volunteering experience, community work, mentoring, open-source contributions, or nonprofit work. Include the organization, role, dates, location, and the impact of your contribution.

Example:

Mentor | Example Coding Community

March 2021 - Present | Remote

Mentor early-career developers by reviewing projects, giving technical feedback, and helping participants prepare for interviews.

Education

List your education here in a concise ATS-friendly format. Include degree, institution, and graduation date or date range.

Example:

B.S. in Computer Science | Example University | 2020

Certifications

List your certifications here. Include certification name, issuing organization, and completion date.

Example:

Cloud Practitioner Certification | Example Cloud Provider | May 2023

Skills

List your skills here using commas. Include tools, technologies, methodologies, domain knowledge, and role-specific keywords that are true for your background.

Example:

Python, SQL, PostgreSQL, API Integrations, Workflow Automation, Data Analysis, Git, Agile, Technical Documentation.

Languages

List your languages here. Include proficiency level for each language.

Example:

English | Professional Working Proficiency

Spanish | Native

Honors & Awards

List awards, honors, competitions, grants, scholarships, publications, or distinctions that may strengthen applications. Keep this section only when the content is relevant or useful for the target role.

Example:

Innovation Award Finalist | Example Startup Competition

September 2021

Selected as a finalist for a prototype that helped small businesses automate customer follow-up workflows.
